

ENVIRONMENTAL MANAGEMENT POLICY

All DNA Electrical activities will be carried out as to protect the environment including the prevention of pollution.

DNA Electrical is committed to conduct its operations in a manner that is environmentally responsible and sustainable.

The primary goal of the policy and associated procedures is to assist in maintaining the highest environmental standards.

The objectives of the policy are to:

- Work pro-actively with all levels of government, regulatory agencies, our clients and other community stakeholders to enable environmental issues to be addressed at an early stage of operations.
- Ensure that we inform, listen to and respond to the reasonable needs of local communities affected by our works
- Undertake activities in a manner that is consistent with the principles of ecologically sustainable development
- Prevent pollution and minimize other adverse impacts of our activities on the natural, built and cultural environment
- Reduce waste through minimisation strategies
- Promote environmental awareness amongst all DNA Electrical employees & subcontractors
- Continually improve our environmental performance by periodically reviewing and evaluating our Environmental Policy and management systems
- Encourage all our employees and subcontractors to take personal responsibilities for environmental issues to create within themselves a feeling of ownership for the natural environment
- Achieve and maintain compliance to ISO 14001 Environmental Management Systems

Our commitment to the environment is as important as our commitment to other business objectives.

We will report on our environment performance at our management meetings.
